Experience

Amazon Web Services / SDE 2, Sales Planning / Seattle, Washington Sep 2022 - Present

- Designed and delivered an API using cartesian product algorithms that auto-resolves valid attribute combinations from business classification rules, reducing manual edit interventions by 70%.
- Led refactoring of a tightly-coupled stateful edits system into a shared library achieving 80% code reuse across multiple interfaces, enabling both frontend and backend automation of transactions.
- Designed a contested transactions system that allowed users to challenge and revert automated changes.

Highlight / Software Developer Contractor / Virtual Jan 2022 - May 2022

- Developed and shipped full-stack core features providing clients with insights into user interactions and errors. Worked with Go, GraphQL, and PostgreSQL on the backend. React and Typescript on the frontend.

Nepriis (now Pathful) / Software Developer Contractor / Frisco, Texas June 2019 - May 2021

- Led the frontend refactor from the .NET 4 JSP multi page app to a React/Next JS based single page app.
- Created integration between ServiceStack and Next JS that supported URL rewrites to legacy pages during migration period.
- Created web based internal tooling that streamlined the transcription of videos and the generation of video clips.

Amazon / SDE Intern, Fire OS Multimedia Team / Sunnyvale, California June 2021 - Aug 2021

- Created a camera driver for Fire TV devices that allows customers to use wireless cameras with third party camera/video-conferencing apps.

Audible / SDE Intern / Newark, New Jersey Summer 2019 and 2020

- 2019: Built Java Spring web services serving audiobook recommendation carousels across product pages on "amazon.com".
- 2020: Created an Alexa Skill hosted on AWS Lambda using Node JS and Typescript.

Purch (now Future PLC) / Software Developer Intern / Plano, Texas Summer 2016 and 2017

- 2017: Created product pages on the ShopSavvy iOS app using Swift and UIKit.
- 2016: Developed Apache Cordova mobile apps (iOS and Android) for each of Purch's media brands.

Personal Projects

Codescrim / codescrim.com 2016 - 2018

- Web app enabling computer science clubs to run automated coding competitions.
- Used in [Codecember](#), a coding competition in 2017 where 40+ teams of 4 competed.

Graded / geoooot.com/graded 2016 - 2018

- Mobile app (iOS and Android) enabling students to track and analyze their grades.
- Grew to 35,000+ daily active users across many Texas school districts. Acquired by GradePro in 2018.

Education

Texas A&M University / College Station, Texas

- B.S. Computer Science, Minor in Business
